DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2, 4-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Bristor. Bristor discloses a caddy, equivalent to a kit, comprising a durable container 11 made of plastic (col. 16 lines 35-37) that has an open top for ventilation (figure 4), a sprayer 100, cleaning compositions (col. 17 lines 25-27), and a variety of adaptors that provide quick-disconnect capabilities that could be used with a garden hose (col. 9 lines 10 – 17). Bristor further discloses a purifying device 44 that includes a particulate filter (col. 9 lines 29-30). Bristor also discloses that the caddy can contain brushes (col. 11 lines 50 – 53). This caddy is capable of treating the surface of a vehicle.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 rejected under 35 U.S.C. 103(a) as being unpatentable over Bristor in view of Lee. Bristor does not disclose the inclusion of a wash mitt, yet does disclose that the caddy can include commonly used washing devices for specific cleaning operations including brushes (col. 11 lines 50 – 53), which are very similar in function to a wash mitt in that they provide an abrasive cleaning surface. A variety of wash mitts are notoriously well known in the art and are considered to be commonly used washing devices. Lee discloses one type of mitt that is particularly well suited for cleaning automobiles due to its two surfaces of varying abrasiveness. It would have been obvious at the time of the invention, to modify Bristor and include a wash mitt, like that of Lee, in the caddy as it is a commonly used washing device for removing dirt from surfaces.
